POSTGRADUATE PROGRAMMES

MASTER IN ENGINEERING MANAGEMENT

[MEM]

UNITEN GENERATES
PROFESSIONALS

THE BUSINESS-DRIVEN PROGRAMME FOR ENGINEERS

The Master in Engineering Management [MEM] programme offers engineers and technical managers an integrative approach to acquiring knowledge, business skills and the decision-making aptitude to help face the onslaught of globalisation. The programme strikes a balance between technical efficiency and competitive-edge in business in order to manage engineering-based organisations more proficiently and effectively.

“A Double-Edge Advantage for Engineers in Business”

MEM PROGRAMME STRUCTURE

Core Modules

General

Organisational Behaviour & Management
Managerial Economics

Functional

Accounting & Finance for Managers
Marketing Management
Operations Management
Management Information System

Integrative

Business Research Methods

- Elective I
- Elective II

SEMESTER 4

- Human Resource Management MKTM623
- Business Law & Ethics MGMT643
- Elective III
- Strategic Management MGMT633

MEM Project

TESTIMONIAL

“There are many advantages studying in MEM at UNITEN. Even though I have worked in the electricity industry for years now, I find that the experienced lecturers here are up-to-date and are able to clearly impart the latest of technology and knowledge. The facilities here are good. I have online access and sufficient academic reference to assist my work. The sports facilities such as tennis court, swimming pool, driving range and gymnasium also make staying on campus much nicer. And as an international student, I can count on the help from the supportive UNITEN staff.”
